

Power BI Accessibility Checklist

Assessment 5 - HR Analytics Report | Completed Checklist

This checklist confirms all accessibility requirements applied to the HR Analytics Power BI report. The report covers 1,470 employees across 3 pages with 13 visuals total.

1. Colour & Contrast

Requirement	Status	How Applied
Report uses WCAG AA-compliant contrast ratios (minimum 4.5:1 for normal text)	✓ Done	Verified using WebAIM Contrast Checker
No information conveyed by colour alone - data labels are also used	✓ Done	All charts include direct data labels
Colourblind-safe palette applied	✓ Done	Multiple distinct colours are used across all visuals
Consistent theme applied across all 3 pages	✓ Done	Consistent colour scheme across Executive Summary, Department Drill-Down, Tenure & Salary

2. Titles & Descriptions

Requirement	Status	How Applied
Every visual has a clear descriptive title with a minimum 14pt font	✓ Done	Titles set in Format pane → General → Title for all 13 visuals
Page names are descriptive	✓ Done	Pages named: Executive Summary · Department Drill-Down · Tenure & Salary Analysis
Axis labels present and legible	✓ Done	All axis titles are visible on column, bar, area and scatter charts
Data labels enabled on all key charts	✓ Done	Enabled on bar, column, donut and treemap visuals

3. Alt Text

Requirement	Status	How Applied
Alt text added to every visual via Format → General → Alt text	✓ Done	All 13 visuals across 3 pages have alt text

Alt text describes the key finding, not just the chart type	✓ Done	Example: 'Bar chart showing employees earning under R5,000/month have the highest attrition at 129, compared to only 7 for those earning over R15,000'
Decorative elements have empty alt text	✓ Done	Slicers and filter panels are marked accordingly

4. Tab Order & Keyboard Navigation

Requirement	Status	How Applied
Tab order set logically using View → Selection → Tab order	✓ Done	KPI cards first (1-5), then charts, slicers last on each page
Navigation between pages is accessible	✓ Done	Page tabs at the bottom of the report are keyboard accessible
Slicers are placed consistently and are accessible via keyboard	✓ Done	Department slicer top-right on Pages 1 and 2; Gender slicer on Page 2

5. Text & Font Readability

Requirement	Status	How Applied
Minimum font size of 12pt for all visible text	✓ Done	Smallest text = data labels at 12pt minimum
Clean sans-serif font used throughout	✓ Done	DIN font used — optimised for screen readability
No italic-only fonts used for key data labels	✓ Done	Bold used for card values; standard weight for labels

6. Slicers & Interactivity

Requirement	Status	How Applied
All slicers have clear labels indicating what they filter	✓ Done	Slicers titled 'Filter by Department' and 'Filter by Gender'
The default slicer state shows all items on first load	✓ Done	All departments and genders are shown by default
Cross-filtering was reviewed to avoid confusing the narrative	✓ Done	All visuals cross-filter correctly via star schema relationships
